FEATURES

Optimal Transparency

Self-lit transparent OLED display has a final transmittance upto 40%, while polarizers and filters cut down transparency rate to 10% from LCD technology.

Quick & Easy usage

All-In-One package supports 'Plug And Play' whoever feel more comfortable.

Seamless Design

High level of transparency dissolves the barriers between the display and its surroundings, resulting in an ingeniously harmonious and creative spatial design.

Beyond Space

The self-lit pixels and high transparency of Transparent OLED display enable seamless incorporation into windows, transforming previously obstructed spaces in subways or offices into a display for information, advertisement, and entertainment.
